What is Panchangam?

Panchangam means that which has 5 limbs (parts). Tithi, Vara (weekday), Nakshatra, Karana, and Yoga — the combination of these five parts is called Panchangam ("Pancha" - "Angam"). Panchangam indicates inauspicious periods (Durmuhurthas) and auspicious timings (Shubha Muhurthas). There are two types of Panchangam: Chandramana Panchangam and Suryamana Panchangam.

Tithi grants wealth, Vara grants longevity. Nakshatra removes sins. Yoga cures diseases. Karana brings success in activities. This is the excellent fruit of Panchangam. The wise person who acts according to the proper time receives divine blessings.

==========

What does a Panchangam contain?

Along with the above five limbs, it also contains details about the positions and special conditions of the Sun and other planets. In the Panchangam, for each day, the duration up to which the tithi and other elements remain is written. It includes the sunrise and sunset timings for the day, English dates, Shali vahana Shaka dates, and the names of the planets transiting on that day. Tithi, Vara, Nakshatra, Yoga, and Karana are written in sequence. Ayana, season, English month, and year are written beside the English dates. After the tithi and nakshatra, the duration for which they remain on that day is mentioned. The

starting time of Durmuhurtha and the duration to be avoided are also written. At the beginning of the month, there is a chart showing planetary positions. Some Panchangams also include horoscopes showing daily planetary positions. Lagna ending times for both day and night are included. Auspicious timings, eclipses, planetary combustions, etc., are indicated.
==========

Uses of Panchangam:-

(1) To know the correct time for performing Vedic rituals
(2) To know the positions of the Sun and other planets
(3) To know auspicious timings (Sumuhurthas)
(4) To know the year (named years beginning with Prabhava), Ayana (Uttarayana, Dakshinayana), seasons (Vasantha Ritu, Grishma Ritu, Varsha Ritu, Sharad Ritu, Hemanta Ritu, Shishira Ritu), months (months beginning with Chaitra), fortnight (Paksha), weekday, tithi, etc.
(5) To know sunrise and sunset timings
(6) To know festival days
(7) To know Varjya periods and Durmuhurtha timings
(8) For preparing horoscope charts
(9) To know eclipse timings, Guru Madhyami, Shukra Moudhyami periods, and transit results

How is Tithi formed?

Tithis are formed based on the angular distance between the Sun and the Moon.

Method of formation of Tithi:
Rule of 12 degrees: Every time the Moon moves 12 degrees ahead of the Sun, one Tithi is completed.

Total Tithis: In one complete lunar month (360 degrees), there are a total of 30 Tithis (30 × 12° = 360°).

Important phases:
Amavasya (New Moon): Occurs when the Sun and Moon are together at the same position (0-degree angle).

Pournami (Full Moon): Occurs when the Sun and Moon are opposite each other (180-degree angle).

Division of Pakshas and Tithis:
In one month, Tithis are divided into two Pakshas:

Shukla Paksha (Bright Fortnight):- The 15 Tithis from Amavasya (New Moon Day) until the Moon waxes and reaches Pournami (from Padyami to Pournami).
(1) Padyami, (2) Vidiya, (3) Tadiya, (4) Chavithi, (5) Panchami, (6) Shashti, (7) Saptami, (8) Ashtami, (9) Navami, (10) Dashami, (11) Ekadashi, (12) Dwadashi, (13) Trayodashi, (14) Chaturdashi, (15) Pournami.

Krishna/Bahula Paksha (Dark Fortnight):- The 15 Tithis from Pournami (Full Moon Day) until the Moon wanes and reaches Amavasya (from Padyami to Amavasya).
(1) Padyami, (2) Vidiya, (3) Tadiya, (4) Chavithi, (5) Panchami, (6) Shashti, (7) Saptami, (8) Ashtami, (9) Navami, (10) Dashami, (11) Ekadashi, (12) Dwadashi, (13) Trayodashi, (14) Chaturdashi, (15) Pournami.

The speed of the Moon is not constant. Therefore, the duration of a Tithi varies approximately from 19 to 26 hours. Hence, sometimes two or three Tithis may occur on the same day, or one Tithi may continue for two or three days. If three Tithis occur on the same day, it is called “Avama,” and if one Tithi extends over three days, it is called “Tridyuspruk.”

==========

Weeks (the seven days of the week) were formed according to ancient Indian astronomy based on the Hora system or the speed of the planets. The main principles behind this are:

1. Order of the planets (based on distance from Earth):

In ancient times, the planets were arranged in this order based on their distance from Earth or the speed at which they moved across the sky:

Saturn -> Jupiter -> Mars -> Sun -> Venus -> Mercury -> Moon

(from the slowest-moving Saturn to the fastest-moving Moon).

2. Hora system (division of hours):

A day is 24 hours a day (Horas).

Each hour is ruled by a planet in the order mentioned above.

Whichever planet rules the first hour of the day (at sunrise), that day gets the name of that planet.

An example of how the weekdays got their names:

Sunday: If the first hour begins with the Sun (Ravi), it becomes Ravi Vara (Sunday). Counting the 24 hours of that day in the same planetary order, the 25th hour (the first hour of the next day) falls under the Moon.

Monday: Since the first hour of the next day belongs to the Moon, it becomes Monday (Soma Vara).

Tuesday: Again, after counting 24 hours, the first hour of the following day comes under Mars (Mangala).

In the same way, Wednesday, Thursday, Friday, and Saturday are formed in sequence. It is remarkable that this order is almost the same across cultures worldwide.

The weekdays in order are Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.

According to Indian astrology, there are a total of 27 Nakshatras (lunar constellations). In some cases, the “Abhijit” Nakshatra (between Uttara Ashadha – 4th quarter and Shravana – 1st quarter) is included and counted as 28, but for standard Panchanga calculations, only 27 Nakshatras are commonly used.

List of the 27 Nakshatras:

The Nakshatras begin with Ashwini and end with Revati:

1. Ashwini, 2. Bharani, 3. Krittika, 4. Rohini, 5. Mrigashira, 6. Ardra, 7. Punarvasu, 8. Pushyami, 9. Ashlesha, 10. Magha, 11. Pubba (Purva Phalguni), 12. Uttara (Uttara Phalguni), 13. Hasta, 14. Chitta, 15. Swati, 16. Vishakha, 17. Anuradha, 18. Jyeshtha, 19. Mula, 20. Purvashadha, 21. Uttarashadha, 22. Shravanam, 23. Dhanishtha, 24. Shatabhisha, 25. Purvabhadra, 26. Uttarabhadhra, 27. Revati

How were the Nakshatras formed?

Nakshatras are explained in two ways: astronomically and mythologically.

Astronomical explanation:

The 360-degree celestial path around Earth (the Zodiac) was divided into 27 equal parts. The Moon takes about 27.3 days to orbit Earth, meaning that each day the Moon appears near a particular constellation in the sky. The Nakshatra of a given day is determined by the constellation in which the Moon is located that day.

Mythological story:

According to Hindu mythology, these 27 Nakshatras are the daughters of Daksha Prajapati. Daksha gave his 27 daughters in marriage to the Moon. The Moon spends each day with one wife (Nakshatra), visiting all of them once every month. Each Nakshatra is further divided into 4 quarters (Padas), making a total of 108 Padas (27 × 4) in the astrological chart.

==========

According to the Panchangam, there are a total of 27 Yogas. These are formed based on the combination of the exact longitudes of the Sun and the Moon. They are also called “Nitya Yogas.”

List of the 27 Yogas:

The 27 Yogas in order are:
(1) Vishkambha, (2) Preeti, (3) Ayushman, (4) Saubhagya, (5) Shobhana, (6) Atiganda, (7) Sukarma, (8) Dhriti, (9) Shoola, (10) Ganda, (11) Vriddhi, (12) Dhruva, (13) Vyaghata, (14) Harshana, (15) Vajra, (16) Siddhi, (17) Vyatipata, (18) Variyan,

(19) Parigha, (20) Shiva, (21) Siddha, (22) Sadhya, (23) Shubha, (24) Shukla, (25) Brahma, (26) Indra, (27) Vaidhriti.

How are Yogas formed? (Method of Calculation)

According to astrology, Yoga is determined by the combination of the positions of the Sun and the Moon.

Mathematical Formula:

The sum obtained by adding the longitude of the Sun and the longitude of the Moon is called Yoga.

Division of Degrees:

Just like the Nakshatras, the 360 degrees celestial path are divided into 27 parts. Therefore, each Yoga spans 13 degrees and 20 minutes (13°20').

Determination:

Whichever 13°20' range the total longitude of the Sun and Moon falls into, that Yoga is considered to be prevailing at that time.

Important Note:

According to the Panchangam, elders say that Yoga helps in the destruction of diseases ("Yogena Roga Nashanam"). Among these, some Yogas such as Atiganda, Shoola, Ganda, Vyatipata, and Vaidhriti are considered inauspicious.

Karanas are the fifth limb of the Panchangam. There is a total of 11 Karanas. Half of a Tithi is called a "Karana." That means each Tithi has two Karanas.

The 11 Karanas are divided into two types (Movable and Fixed):

1. Movable Karanas (7 – changing):

These repeat eight times a month.
(1) Bava, (2) Balava, (3) Kaulava, (4) Taitila, (5) Garaja, (6) Vanija, (7) Bhadra (also called "Vishti").

2. Fixed Karanas (4 – permanent):

These occur only once a month.
(8) Shakuni, (9) Chatushpada, (10) Nagava, (11) Kimstughna.

How are Karanas formed?

The formation of a Karana depends on the formation of a Tithi.

Mathematics:-

We know that one Tithi is formed for every 12 degrees of angular distance between the Sun and the Moon. Half of that Tithi means one Karana changes for every 6 degrees of distance.

Division:

The first half of a Tithi (first 6 degrees) is called one Karana, and the second half (next 6 degrees) is called another Karana.

Sequence:

From the second half of Shukla Paksha Padyami (the first Tithi) up to the first half of Krishna Paksha Chaturdashi (14th Tithi), these 7 movable Karanas occur repeatedly in sequence eight times.

The remaining 4 fixed Karanas begin from the second half of Krishna Paksha Chaturdashi and continue through Amavasya up to the first half of Shukla Paksha Padyami in sequence.

Importance:

According to astrology, “Karanena Karya Siddhih” means that one should choose a good Karana for success in any undertaking. Especially the Bhadra (Vishti) Karana is considered inauspicious, and auspicious activities are generally avoided during that period.

These planets are the most powerful in the horoscope and hold the most importance as they are karmic planets. These planets give results based on meritorious sins acquired through past karmas. This is particularly evident in the suddenness or unexpectedness of the results these two planets give.

Ketu:- Ketu is the moksha karaka and is primarily responsible for the spiritual elevation of the soul. Ketu is also known as "Jnani", meaning enlightened one. Therefore, Ketu does not give favorable results in terms of material well-being and hinders progress and ambitions. However, when Ketu is well placed it revives the spiritual side of the soul and leads to soul realization and enlightenment. It makes one renounce the comforts of home and family. In the horoscopes of Yogis, Sadhus and Rishis, this planet appears very powerful. Ketu causes danger from cuts and wounds, sudden death, fear of cats and mice, eye pains, depression, suicidal tendencies, itches and sores, fire, poisons, fig trees, betel leaves, uvula etc. It represents the maternal grandfather.

Gemini (Mithuna Rashi): The Eternal Child,child's laughter, a mind bursting with ideas, a tongue that never tires—this is Gemini. Ruled by Mercury, Gemini is the sign of curiosity,duality, and the eternal student. Those with strong Gemini influence scan talk endlessly, their minds racing faster than their mouths can keep up.But there's a catch—Gemini loves to generate ideas, yet struggles with execution. The winds of their airy nature make them great conversationalists, writers, and traders, but unless grounded by other planets,they flit from one passion to the next, never quite settling.

Horary rising moon at the time of question is Purvashada. Hence, Venus posited Mesha Rasi become Nakshatra Prasna Lagna.

Horary rising Moon's (Venus) Jeeva is Venus. Jeeva planet Venus posited in the own star Venus. Hence, Rasi lord Mars become Sareera. Mars associated with Sun and Saturn. But Mars and Sun got digbala. At the time of question, HRM posited in 9th house. DRM posited in 8th house, Sareera planet Sun posited in 12th house along with Saturn. Saturn also aspecting HRM.This indicate me that the function is not possible immediately. I have expected 28th April or 30th April 2026(sun in Bharani which is jeeva planet ofHRM). Hint

Uterus is a hidden organ connected to genitals in females. 8th house is considered as hidden house. 8th house is the place where Uterus is located.

Jupiter is Karaka for childbirth. Uterus is for bearing the foetus. Constellation Visakha last quarter in Scorpio is the place where Uterus is located.

Venus is Karaka for the uterus and ovaries. Venus also governs reproductive organs.

Moon represents the menstrual cycle and its duration.

Medical astrology offers various interpretations and insights into health issues related to the uterus, considering factors such as planetary placements, aspects, and transits in an individual's birth chart. Here are some common associations and considerations in medical astrology regarding uterus issues:

1. **Moon and Venus**: The Moon and Venus are typically associated with the reproductive system, including the uterus, in medical astrology. Afflictions to these planets or their placements in

certain houses of the birth chart may indicate susceptibility to uterine issues.

2. **Fourth and Eighth Houses**: The fourth house governs the reproductive organs and the home environment, while the eighth house relates to reproductive organs' transformational processes and potential issues. Afflictions or malefic influences in these houses could suggest underlying uterine concerns.

3. **Planetary Afflictions**: Malefic planets such as Mars, Saturn, and Rahu (North Node) may indicate potential challenges or disturbances in the reproductive system, including the uterus, when they afflict relevant houses or planets in the birth chart.

4. **Lunar Phases and Transits**: Lunar phases, particularly the New Moon and Full Moon, are believed to influence bodily fluids and hormonal cycles, which can impact the reproductive system, including the uterus. Additionally, transits of malefic planets or eclipses affecting the ruler of the fourth or eighth house may correlate with uterine issues.

5. **Astrological Remedies**: Astrologers may recommend specific remedies based on the individual's birth chart to alleviate or mitigate potential uterine issues. Remedies could include wearing gemstones associated with benefice planets, performing specific rituals or mantras, or adopting lifestyle changes aligned with astrological principles.

6. **Dasha (Planetary Periods)**: Dasha periods, which represent specific planetary influences over time, may coincide with the manifestation or exacerbation of uterine issues. Analysing the Dasha sequence in the birth chart can provide insights into the timing of potential health challenges and periods of vulnerability.

The native's Ascendant rises in Scorpio.

Ascendant Lord and 6th house lord is Mars. Ascendant Lord Mars is in the star of Venus and associated with Mars in 6th house where Mars is aspecting Yoga Karaka Moon, Mars is aspecting Saturn also.

Ascendant Lord and 6th house lord Mars signifies 1-2-3-4-6-7-8-9-11-12. Hence the native may suffer from the problem in genital system.

Query:

In recent times there are several issues going on in software companies. A person is doing a job and he got an offer in another project so he resigned in the present project to join in the new one. After his resignation the higher department gave a bad conduct report that he is using AI in the project so he was dismissed from the job. Now he don't have any job, he asked when the problem will be solved.

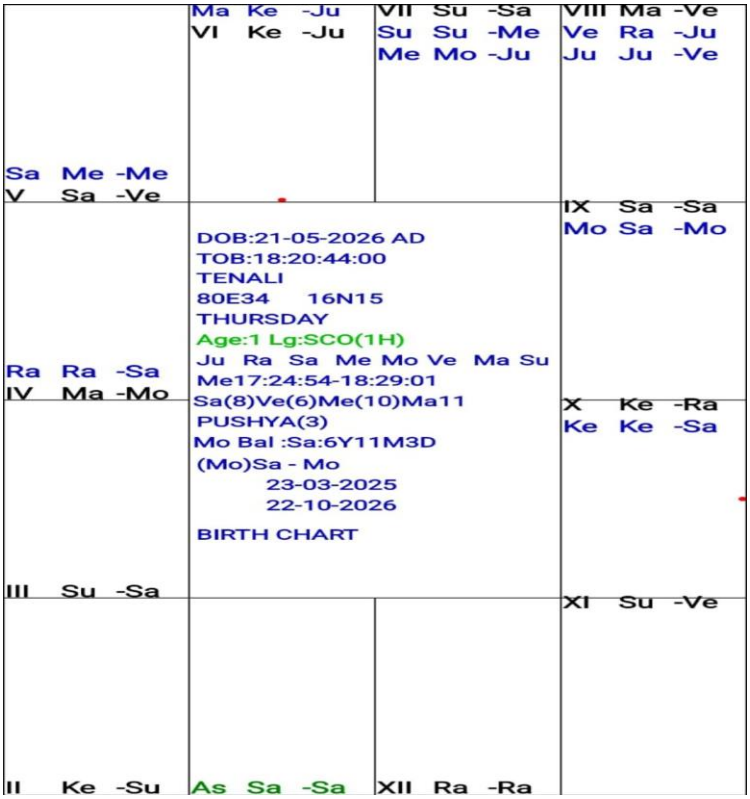
Horoscope:



Analysis:

By seeing the horoscope ascendant moon are on the watery signs and under the influence of Saturn. The present period is also the Saturn moon period which shows delay and dejections.

The present running period Saturn and moon are placed in 5th and 9th houses respectively which are detrimental to service houses 6 and 10. This shows the clear evidence that it will take time to solve the problem as the moon and Saturn combination itself causes punarpoo.

The impact of the ascendant on the watery sign Saturn zone says he is very much disturbed and not ready for immediate action.

The upcoming period is of mars, which is exactly posited on 6th house, in this period he regained his strength and will fight against the allegation. Mars in Ketu star ,

who is in tenth House career. He will gain his job and strength from November and join in his job from December.

MARRIAGE DESTINY

7 th sub and Destiny planet for marriage is Mercury

Elem.	Planet	CL	OCC	CST	CSL

SL (RLof)	MAR (RAH*)	1,6	9 1	4,8,12	2, 8
ST-SL	SAT	3,4	3	1, 9	11

Mercury is lord of 8,11 in 6, star lord of 5 and sub lord of 1, 5,7,12..

Starlord Venus is lord of 7,12 in 4+5, star lord of 6,10 and sub lord of 4,6,10.

Second planet Kethu is in 7 and starlord of 2..

Starlord of Starlord Saturn is lord of 3,4 in 3, star lord of 1,9 and sub lord of 11

Sublord Mars is lord of 1,6 in 9..

Second Planet Rahu is in 1 and starlord of 4,8,12 sublord of 2,8..

Starlord of Starlord Saturn is lord of 3,4 in 3, star lord of 1,9 and sub lord of 11..

Sub lord Mars and its starlord are having Favorable connections more..

Mars second planet Rahu is having unfavorable connections more..

All the levels are having Mixed connections having Favorable more .

The Native is blessed with Marriage...Married life will have problems..

PILT ANALYSIS TO FIND TIMING ..

Favorable key planets in self are Moon,Saturn,Kethu,Mercury,Jupiter...These key planets are checked in PILT table ..The good period planets having selection are Moon,Saturn ,Kethu,Venus,Mars,Jupiter..

..Good and Bad key planets are used to identify the bhukthi planet and anthara planet for the marriage..Saturn is the Favorable key planet of destiny planet..Venus is the most unfavorable key planet of destiny planet. Planets having Saturn as ruler in primary levels but with no connection of Venus will give marriage. Moon dasa lord has Saturn as sublord..Key planets of dasalord is Moon..

..At the time of consultation Moon dasa Jupiter bhukthi was running..(01/2024 to 05/2025).Jupiter bhukthi planet has no role of Saturn in primary level but it comes only in secondary level..So Jupiter bhukthi period was eliminated..

In Saturn period Saturn rules in level1 and 2A with ruler link to level 2 ..Moon number 1 key planet is sub lord of Saturn .Moon also gives ruler link support to level 2..So Saturn is strong ..

. Kethu has no role of Saturn..So Kethu is eliminated..

Venus source planet is bad..Hence Venus is eliminated..Mars has been selected.. Next Mercury,Kethu,Venus periods are not good.

Hence Saturn is selected as bhukthi lord.. So Moon/Saturn/Mars has been selected..The connected period is 24.05.2026 to 27.06.2026..

But Marriage was celebrated on 27.04.2026 one month before the predicted period....It is Moon anthara..Again the PILT is checked ..Moon is good planet and

as it is dasa lord , and so it was not considered as anthara lord..But Moon has good PILT connection with Saturn and both rulers are jumbled..So Moon anthra itself has given marriage..

Moon/Saturn/Moon has given marriage on 27.04.2026..(06.04.2026 to 24.05.2026)

CONCLUSION

Moon/Saturn/Moon period is 06.04.2026 to 24.05.2026..and

Marriage was celebrated on 27.04.2026 in this spell..

DAGDHA RASHI

The Magic box consists of 12 Rashi's. Astro sages when devised the Magic box have distributed the 28 Nakshatras uniformly in all the 12 Boxes or Rashis. Rashis are filled with Nakshatras each with 4padas. Each Rashi has a lord to the house with 2.1/2 stars and 9 padas. Each Rashi has its own individual traits or Karakatwas. Apart from Rashis, some Houses do not exhibit expected strength or result. The degree of distance between The Sun and the Moon is measured as Tithi. Dagdha Rashi is the result of the combination of Day, Tithi and Nakshatra. It is a highly specific astrological concept derived from the lunar day(Tithi) of a Person's birth. As the Planet Sun moves nearer to the planet Moon, Sun heat burns anything nearer to it…Hence Dagdha or Some of them may behave as Burnt "Dagdha" Rashis.

Tithi, is most important in predictive astrology. Tithi assumes an extremely distinctive part in astrology though the majority of the Vedic astrologers overlook 'its significance while making forecasts. We have 14 Tithis of Shukla Paksha(waxing Moon period) and 14 of Krishna Paksha,(waning Moon period) in this way making the aggregate of 28. Since one Tithi contains Poornima (Full moon) and one Amavasya (New moon) an aggregate 30 Tithis and these 30 Tithis make one lunar month. To start with Tithi is known as Pratipada (1st) and the last one is Chaturdashi,(14th) barring Poornima and Amavasya. Each native is born on some Tithi from Pratipada to Chaturdashi and obviously on Poornima and Amavasya also. Presently on each Tithi two Rashis (signs) are given the name of Dagdha Rashis and on some Tithis four Rashis(signs) fall under the classification of Dagdha Rashis(signs).

*On Poornima and Amavasya no Rashi is Dagdha Rashi(sign).

The precise significance of Dagdha is smoldered.

*These Dagdha Rashis give either magnificent or most exceedingly awful results under specific conditions.

it is always good if this Dagdha Rashi(sign) falls in a Trik Bhava (6,8,12 houses), since a negative Rashi falling in a negative Bhava/house will give good results.

In case either of the Dagdha Rashi(sign) falls in a good Bhava/house, it is certain to spoil some good qualities of the concerned Bhava/house.

Apart from Sun and Moon, every planet has ownership over two Rashis (signs) and the Rashi (sign), which is Dagdha, suffers and not the other sign owned by the same planet.

If a benefic planet is posited in Dagdha Rashi (sign) at the same time it is in retrograde motion, it will give excellent results during its period, or sub period. But in case this benefic happens to be in its direct motion it will give worst results in its period or sub period. Up to some extent this rule is valid during transit also

If a malefic planet is posited in a Dagdha Rashi (sign) but in its direct motion it will give excellent results during its period and its sub period. But in case this malefic happens to be in its retrograde motion, it will give worst results during its period and sub period. Again up to some extent this rule applies during transit also.

Since Rahu's(north node) and Ketu's (south node)natural motion is retrograde only and they never move in a direct motion, therefore placement of these two planets in a Dagdha Rashi (sign) will always give excellent results during their periods and sub period. But out of the two, Rahu will give much better results as compared to Ketu.

In case a Dagdha Rashi (sign) is occupied by two planets, out of which one is malefic and other is benefic and this malefic is in direct motion and the benefic in a retrograde motion, in such a case in one planet's major period the sub period of other planet will give excellent result. In case, as per rules if malefic is in its direct motion and the benefic is retrograde, a major period is that of malefic planet" will give excellent results, but as and when the sub period of benefic runs it will give bad results and vice versa.

The sun and the moon, being luminaries and having only direct motion are exempted from the rules mentioned above.

The Dagdha Rashis are based on each Tithi.

1) Prathama Tithi –Tula(Libra) and Makara(Capricorn)

2) Dwiteeya Tithi ---Dhanu(Sagittarius) and Meena(Pisces)

3) Triteeya Tithi ----Simha(Leo) and Makara(Capricorn)

చింతాకంతయు చింతనిల్పడు గదా శ్రీ కాళహస్తీశ్వరా!! అంటాడు దుర్జటికవి

ప్రతి జీవి నేను, నేను అనే అహంభావంతో కొట్టుమిట్టాడుతూ నా భార్య, బిడ్డలు సంపదలు అంటూ ఊపిరాడనంత వేగంగా సంపాదనలో మునిగిపోయి, తన చుట్టూ తానే అనుబంధాలు, ఆరాటాలు అనే సాలెగూడును అల్లుకొని, సాలెపురుగు తానల్లుకున్న గూటిలోతానే చిక్కుకొని పోయినట్లుగా సర్వమును పోగొట్టుకొని మాయామయ జీవితాన్ని నిర్మించుకొని గడుపుతున్నాడు. కానీ భగవంతుడే తనకు రక్షకుడని ఇంచుకైనా భావించడు గదా!

మాయ అంటే !!

మిథ్యా జ్ఞానమే మాయ అన్ని నాకే తెలుసు అనే అహంకార అజ్ఞానమే మాయ. అంగాత్ అంగాత్ సంభవసి అంటూ తండ్రి బాలసారె నాడు చెప్పుకుంటాడు శిశువుతో. నా ప్రతి అవయవంలోని శక్తిని నీయందు నిక్షేపించాను శరీర భాగాలను అందమైన రూపాన్ని నవమాసాలు మోసి నీ తల్లి తయారు చేసింది

అందుకే జ్ఞాన సంపన్నుడవుగా 100 శరత్తులు మాతృ పితృ సేవనంతో సుఖంగా జీవించు అంటూ దీవించుతాడు తండ్రి శిశువును. మాయను గురించి బృహస్పతి ఇలా అంటాడు మాయను వర్ణించటం ఎవరి తరము కాదు అని.

పురుషుడు

పురము అనగా శరీరం. శరీరము గలవాడు పురుషుడు. కనుక ప్రతి ప్రాణీ పురుషుడే. లింగబేధము ఉండదు వేదవాక్కులో.

నరునకు మూడు గుణాలు సత్వ,రజో, తమో గుణాలు. ఇది మాయ యొక్క శరీరం తనను గురించితాను తెలుసుకొనటానికి అవకాశం ఇవ్వదు మాయ. నరుని అంటు కొని అతడిలోని భాగంగానే ఉంటుంది. అతని భావంలో ,భాషలో, పనిలోనూ కనిపిస్తూ ఉంటుంది. ఈ మాయ ఆత్మను ఆవరించి ఉంటుంది అనగా సత్వ ,రజ, తమోగుణాలు ఈ మూడు మూడుపురులుగా ఆత్మను చుట్టుకొని ఉంటాయి. వాటి నుండి విడివడితేనే మాయ నుండి విడివడటం. ఈ మాయ నుండి తప్పించుకోవడానికి వైరాగ్యము అనే కొడవలి కావాలి. ఆత్మ అన్ని జీవులలోనూ ఉంటుంది గదా!! అది మన చేత బుద్ధి ద్వారా అన్ని పనులను చేయిస్తుంటుంది

శాంతి కావాలి ప్రతివారికీ !!

శాంతి అంటే రూపం లేనిది. అది ఒక గొప్ప వెలుగు. ఇది ఆలోచనలకు, భాషకు అందదు. ఈ శాంతిని సాధించగలిగితేనే మనస్సుకు వూరట.

మరి ఎలా సాధించాలి? మానవుని ప్రకృతిలో 1. మనస్సు 2.వాక్కు 3. బుద్ధి (లోకజ్ఞానం) ప్రధానం. ఇవి ఒకదానికంటే ఒకటిగొప్పవి ఇవి ఇష్టారాజ్యంగా సాగినంత కాలం మన శరీరం మన అధీనంలో ఉండదు సుమా! అందుకే ఈ మూడింటిని లోబరుచుకున్న వానికి పరమేశ్వర జ్ఞానం దొరుకుతుంది. మనసును మనసుతోడి, (మనోభావాలను పరిమితం చేసి తగ్గించుకోవడం ద్వారా) బుద్ధిని బుద్ధితోడి ,(మనసులోని భావాలను చెడగొట్టగలిగే శక్తి బుద్ధి దీనిని నిగ్రహించడం ద్వారా) జ్ఞానాన్ని పరమాత్మ వివేచనం ద్వారా సమకూర్చుకొని మానవుడు స్థిత ప్రజ్ఞుడు కాగలుగుతాడు అప్పుడే మానవ జీవితాలకు శాంతి లభిస్తుంది. అందుకే శాంతి మంత్రాన్ని మూడుసార్లుగా ఉచ్చరించటం మనో వాక్కు కాయములను శుద్ధి పరచడానికే.

లోకంలో ఎవరు గొప్ప!!

పంచభూతాలలో భూమి కంటే నీరు గొప్ప. నీటి కంటే కాంతి, కాంతి కంటే గాలి, గాలి కంటే ఆకాశము గొప్ప ,వీటికంటే మనసు గొప్ప మనసు కంటే గొప్పది బుద్ధి (మేధస్సు) వీటన్నిటికంటే గొప్పది కాలము. దీనిని అధిగమించ గల వారెవ్వరూ ఉండరు. కానీ దానికంటే గొప్ప భగవంతుడు. ఆయన చిద్విలాసంలోనే జీవి తన జీవితాన్ని ఉన్నతంగా తీర్చిదిద్దుకోగలుగుతున్నాడు.

లోకంలో గొప్ప వారెవరు? ఇద్దరే

1. మహారాజు: ఆయన తన రాజ్యాన్ని శాసించగల ధీరుడు
2. యోగి రాజు :ఆయన తన జీవనాన్ని, జీవితాన్ని శాసించగల ధీరుడు

   లోకానికి ధర్మ మార్గాన్ని చూపగల తేజో రూపుడు మనలోని ఆత్మను

పరమాత్మలో విలీనం చేయగల శక్తి ఒక్క యోగి రాజులదేఅనక తప్పదు. యోగం ఒక భోగమే తేజోవంతమైన ఈ శరీరం నందు ప్రధానమైంది సహస్రారం(మాడు). ఈ సహస్రాన్ని ఛేదించుకొని జీవుడు బయటికి వెళ్ళటమే నిర్యాణం (మరణం) యోగీశ్వరులుపొందగలిగేది నిర్వాణం. (యోగనిష్ఠ)
